Intensity-scale verification technique

Casati et al. (2004), Met App, vol. 11

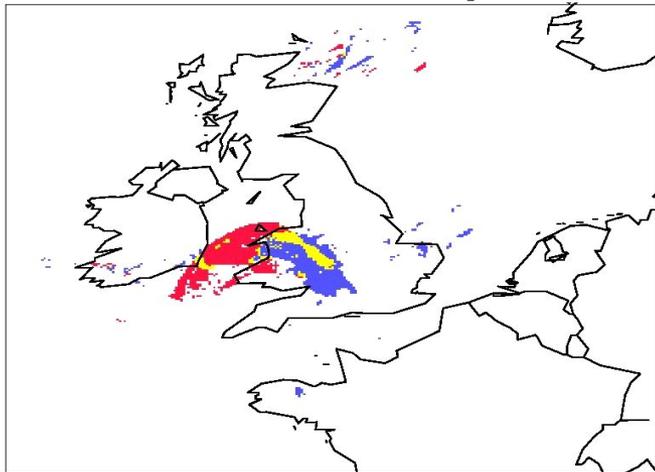

The **intensity-scale** verification approach measures the skill as function of **precipitation intensity and spatial scale of the error**

>> **intensity: threshold** --> binary images (**categorical approach**)

>> **scale: 2D Wavelets decomposition** (features and discontinuities)

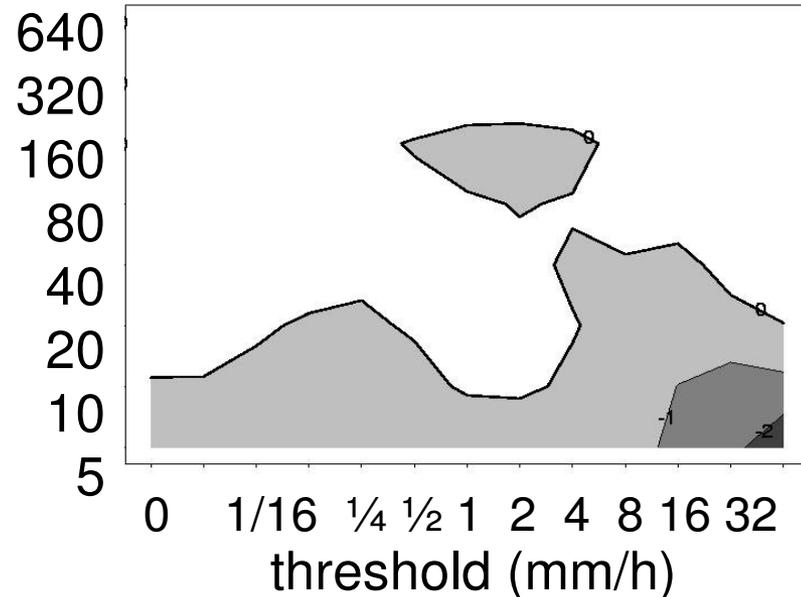

For each threshold and scale: skill score associated to the MSE of binary images = Heidke Skill Score (bridges categorical with scale approaches)

Intense storm displaced

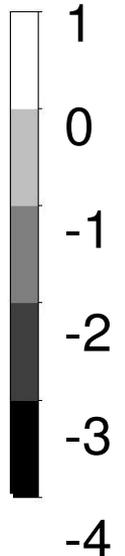

threshold = 1mm/h

scale (km)

Skill

geom005

125 pt to the right wrong orientation (GEOM 004)

125 pt to the right, huge, wrong orientation (GEOM 005)

Intensity Scale Verification, Geometric Shapes

Conclusions

The IS skill score is sensitive to:

1. precipitation intensity (threshold)

2. the scale of the error:

scale (size) of the feature & displacement

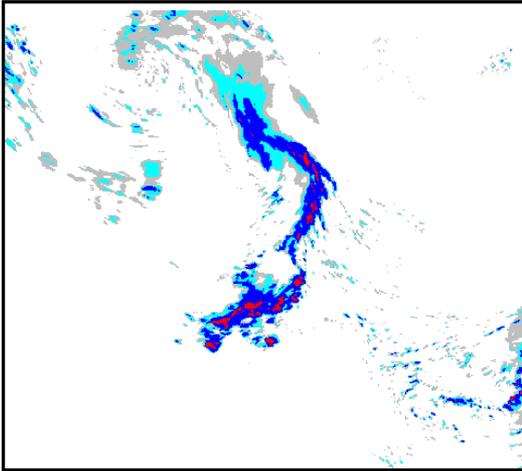

3. not too sensitive to the orientation

Intensity Scale Verification

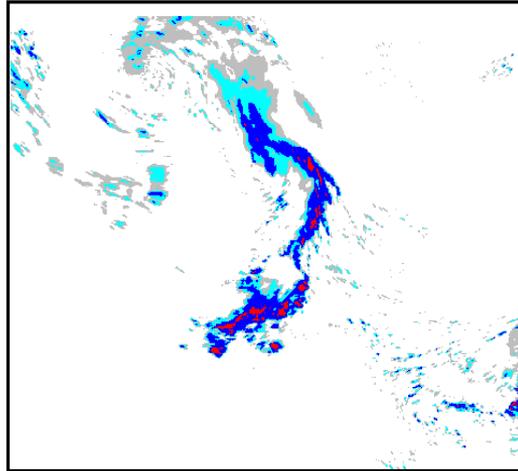

Perturbed Cases

Sensitivity to displacement

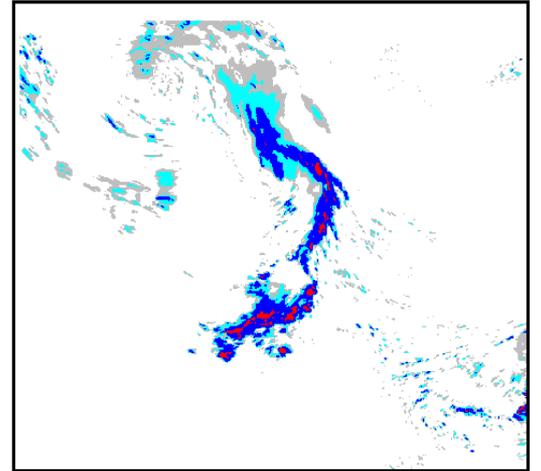

pert000 (truth)

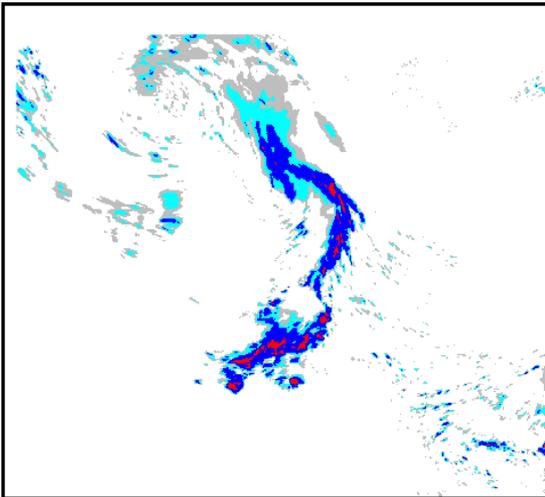

pert001

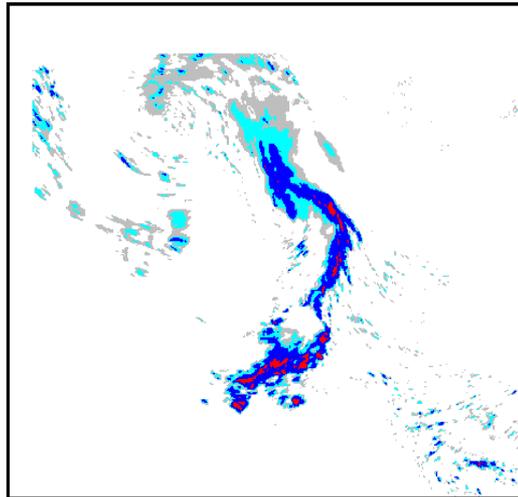

pert002

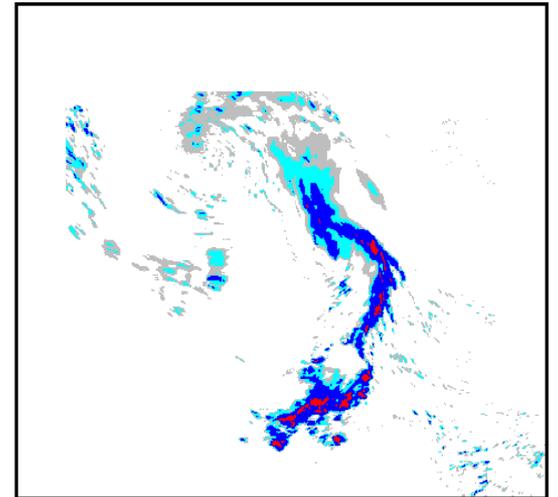

pert003

pert004

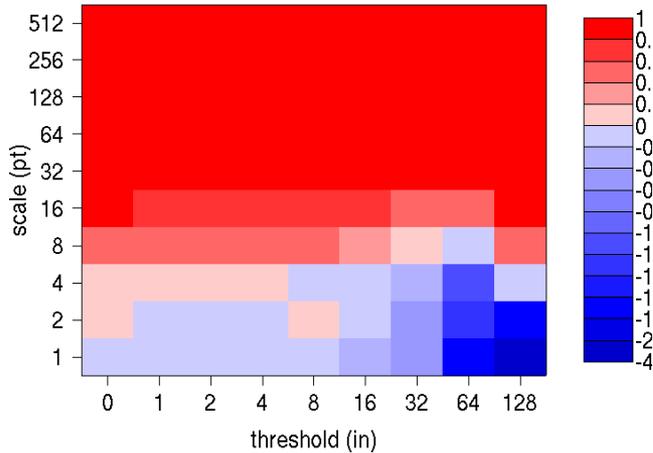

pert005

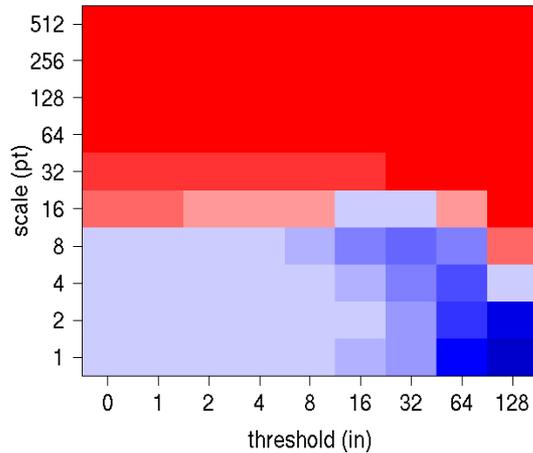

Sensitivity to displacement

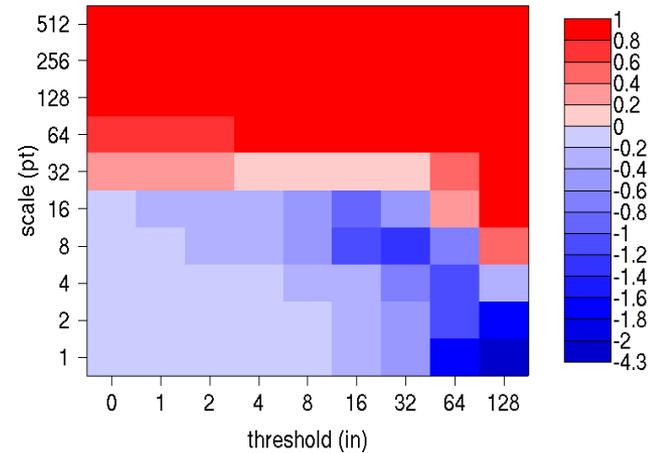

pert001: 3 pt right, 5 pt down

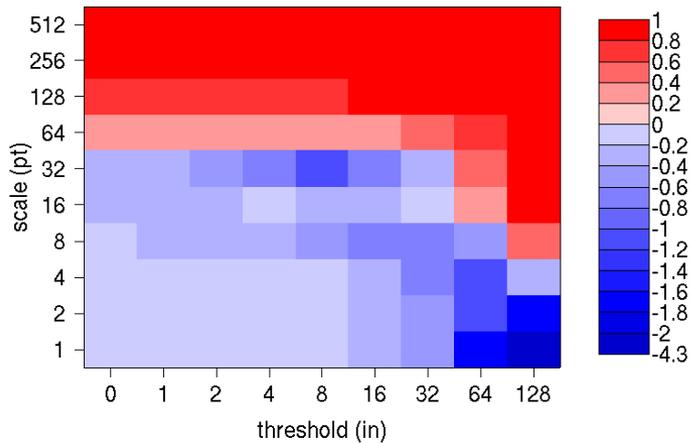

pert002: 6 pt right, 10 pt down

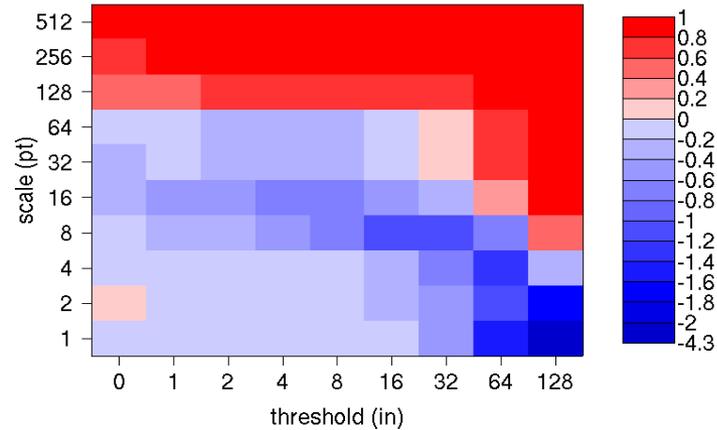

pert003: 12 pt right, 20 pt down

pert004: 24 pt right, 40 pt down

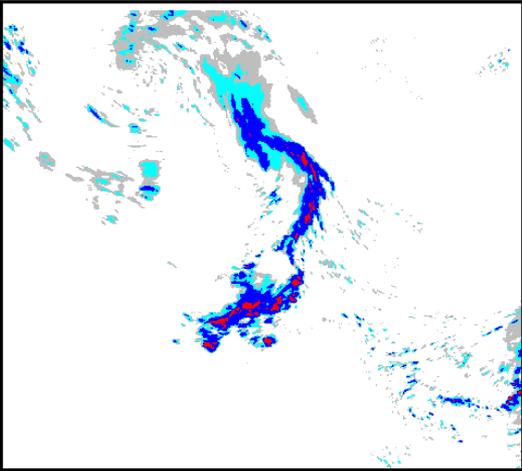

pert005: 48 pt right, 80 pt down

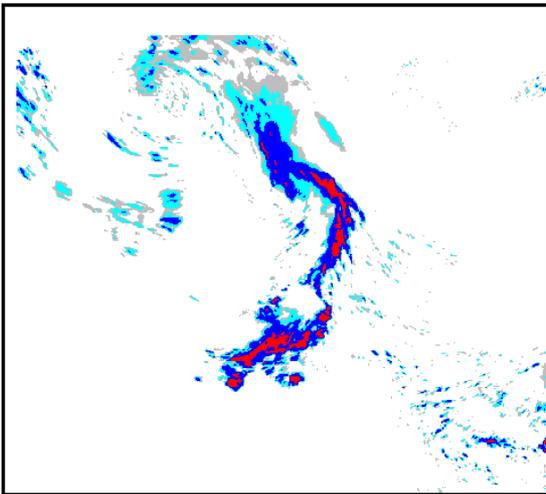

as the displacement is larger, the skill score gets negative on larger scales and smaller thresholds (the fronts separate)

Sensitivity to precipitation intensity

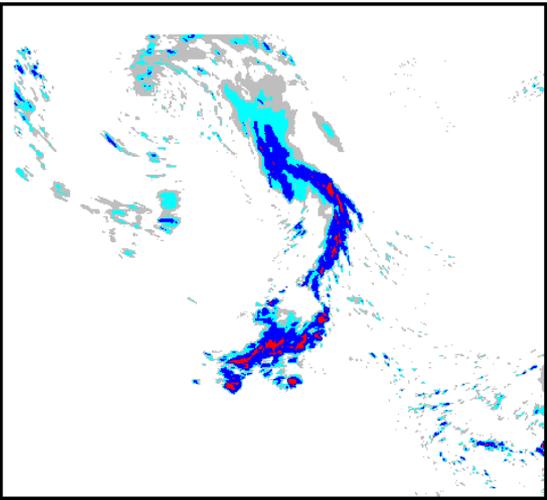

pert000 (truth)

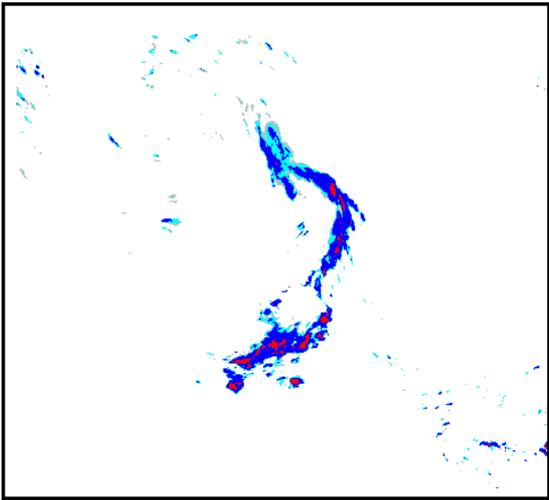

pert006

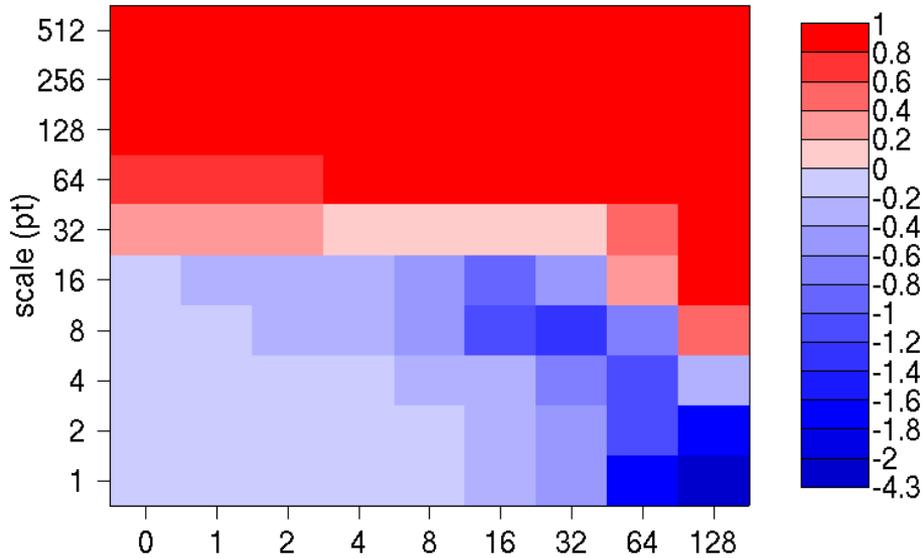

pert003

pert007

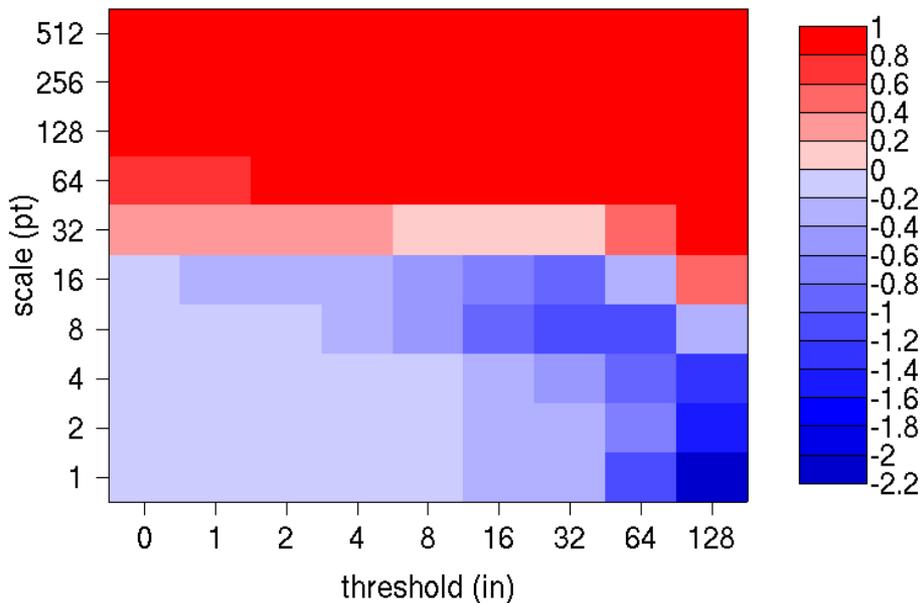

pert003: 12 pt right, 20 pt down

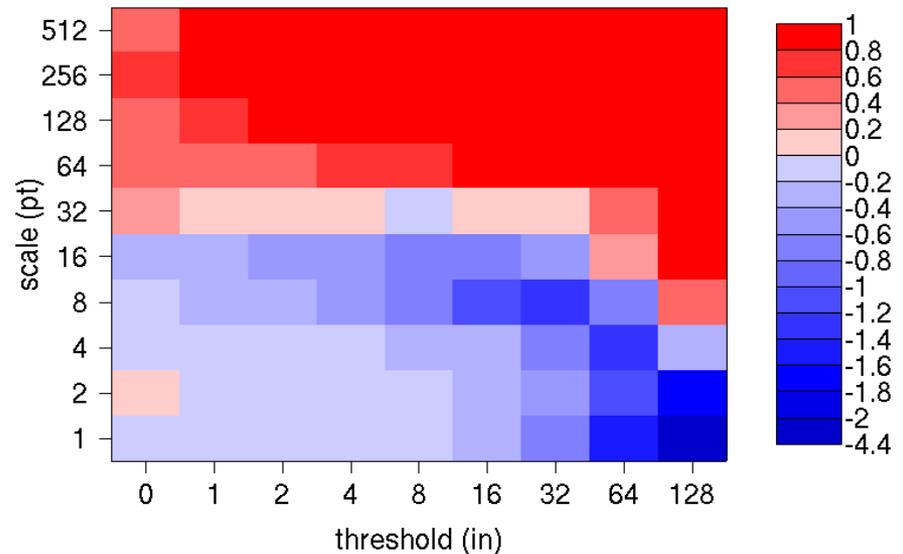

Sensitivity to precipitation
intensity

the negative skill shift from
smaller to larger intensities

pert006: 12 pt right, 20 pt down, pcpn x 1.5

pert007: 12 pt right, 20 pt down, pcpn - 0.05in

Intensity Scale Verification, Perturbed Cases

Conclusions

The IS skill score is sensitive to both the displacement of the front and errors in the intensity of the precipitation

Note that as the displacement is larger, the skill score gets negative on larger scales, but also on smaller thresholds, since the original front and displaced front in the binary images get more and more apart
